EXPERIENCE

August 2023-Present

Frontend Developer, Ittefaq Electronics

As a Frontend Developer at Ittefaq Electronics, I was responsible for building and maintaining the e-commerce website. My key tasks included:

- **SEO Enhancement:** Improving search engine rankings to drive organic traffic.
- **Client Acquisition:** Using SEO strategies to attract and retain clients.
- **Website Performance:** Ensuring a smooth user experience through regular monitoring and optimization.
- **Quality Assurance:** Testing and troubleshooting to maintain website reliability.

These efforts boosted customer engagement and strengthened the online presence of Ittefaq Electronics.

EDUCATION

Sep 2022-Present

Bachelor's in computer science, University of Central Punjab

PROJECTS

Twitter Clone: A real-world social application inspired by twitter containing all the enriching features where users can tweet, engage and share their words with the world. This project utilizes MERN stack technology.

Kicks: An e-commerce mobile phone application built using React Native, Express.js, and MongoDB. This application allows users to buy and save their favorite sneakers. Admins have control over adding new sneakers to the application.
